1. Introduction & Getting Started

This application is an enterprise-grade project tracking and collaboration platform inspired by **Zoho Projects**. It is designed to empower teams with multi-workspace management, real-time Kanban boards, dynamic Gantt charts, organizational reporting hierarchy, time tracking, and a real-world invoicing engine—all presented in a sleek, responsive Glassmorphic UI with full support for Dark and Light themes.

How to Launch the System:

- 1. Open Command Prompt or Terminal inside the project root directory.
- 2. Start the local server by running: `npm start`
- 3. Open your web browser and navigate to: `http://localhost:3000`

2. Demo Credentials

When launching the application, you can either click the quick-login demo buttons on the login screen or enter these credentials:

Role / Access Level	Email Address	Password	Capabilities & Scope
 Executive / Admin (CEO)	<code>admin@demo.com</code>	<code>admin123</code>	Full access to all features including the Executive Dashboard, Team Hierarchy, Password Reset, Billing/Invoicing, and system configurations.
 Project Manager	<code>manager@demo.com</code>	<code>manager123</code>	Can create project workspaces, assign tasks, establish phase milestones, and monitor team time entries.
 Team Member	<code>member@demo.com</code>	<code>member123</code>	Can view assigned tasks, move Kanban cards across columns, log working hours, comment, and upload attachments.

[!TIP] **Language & Theme Toggles:**

- Click the **TH TH / GB EN** button in the top navigation bar to switch language interfaces seamlessly.
- Click the  /  icon to toggle between Dark Mode and Light Mode.

Part 1: User Manual (For Team Members & Managers)

3.1 Workspace & Dashboard

Upon signing in, you will land on your **Personal Dashboard**, which serves as your central productivity hub:

- **Task Counters:** Displays your total assigned tasks, completed items, and pending deliverables.

- **My Tasks:** Lists immediate action items prioritized by upcoming due dates.
- **Project Progress:** Visualizes completion percentage bars for all workspaces you belong to.
- **Switching Workspaces:** Use the project selector dropdown in the top navbar or click the  **Projects** menu in the left sidebar to navigate into a specific project workspace.

3.2 Task Management

Inside a project workspace, navigate to the  **Tasks** tab to manage action items:

- **Creating Tasks:** Click **+ Create Task**. In the modal, define the task title, priority level (**Low** , **Medium** , **High**), assign a team member, set a target due date, link it to a milestone phase, and optionally configure a recurring schedule (**Daily** , **Weekly** , **Monthly**).
- **Editing & Discussing:** Click any task title to open the **Task Details Modal** where you can modify properties, review status, and communicate with colleagues.

3.3 Kanban Board (Drag & Drop)

Click the  **Board** tab to view tasks organized into three workflow columns: **To Do** , **In Progress** , and **Done** .

- **Drag & Drop Workflow:** Click and hold any task card, then drag and drop it into a different column to update its workflow status instantly. The system persists the change to the database and recalculates project progress metrics automatically.

3.4 Gantt Chart Timeline

Click the  **Gantt** tab to explore a visual schedule of project phases and deadlines:

- **Zoom Levels:** In the top right corner of the chart, click the view toggles (**Day** , **Week** , or **Month**) to adjust the timeline zoom scale.
- **Task Details:** Hover your mouse over any horizontal timeline bar to inspect the task name, assigned owner, duration, and completion status.

3.5 Milestones & Deliverables

Click the  **Milestones** tab to track major project deliverables and phase objectives:

- **Adding Milestones:** Click **+ Add Milestone** to define a phase title and deadline date.
- **Completing Deliverables:** Check the circular checkbox next to a milestone to mark it as **Completed**. The progress bar will turn green at 100%, displaying a trophy icon.

3.6 Time Tracking & Timesheets

Click the  **Timesheet** tab to log working hours against specific project tasks for profitability tracking and client billing:

- **Logging Work:** Select the relevant task from the dropdown, input the hours worked, choose the date, and enter descriptive work notes. Click **Log Time**.
- **Billing Status:** Logged time entries remain marked as **"Unbilled"** until an Administrator or Project Manager incorporates them into a formal client invoice.

3.7 Comments & File Attachments

Click any task title to open the Task Details Modal, which hosts the team's collaboration suite:

- **Discussion Stream (Comments):** Type messages and click Post to ask questions, report progress, or provide feedback directly beneath the task.
- **File Vault (Attachments):** Click  **Attach File** to upload architectural diagrams, specifications, PDF documents, or screenshots, storing them securely within the task context.

Part 2: Administrator & Executive Manual

4.1 Executive Dashboard & KPI Analytics

Exclusive to Administrators and Executives (CEO), accessed via  **Executive Dashboard** in the left sidebar:

- **KPI Ribbon:** Real-time summary metrics displaying Total Projects, On-Track Projects, Delayed Projects, and Total Budgeted Revenue across the entire organization.
- **Project Health Table:** Evaluates the financial and operational health of every workspace, showing completion percentages, budget utilization, and automated risk flags (**Healthy** , **At Risk** , **Critical**).
- **Team Workload & Performance:** Monitors active tasks versus completed outputs per employee, enabling leadership to balance workloads and prevent staff burnout.

4.2 Team Hierarchy & Role Management

Click  **Team Management** in the sidebar to administer user accounts and organizational reporting lines:

- **Adding Profiles:** Click **+ Add Team Member**, enter their name, email, and assign an initial password.
- **Role Assignment:** Assign one of three access tiers:
 - **Admin**: Full executive access to financial controls, user permissions, and dashboards.
 - **Manager**: Department or project leader capable of creating projects, assigning tasks, and approving timesheets.
 - **Member**: Standard employee access restricted to assigned workspaces and tasks.

- **Reporting Hierarchy (Reports To):** Select a direct supervisor in the "Manager" dropdown field. This establishes the organizational chain of command, allowing supervisors to delegate tasks and track departmental efficiency.

4.3 Password Reset & Credentials Management

Administrators maintain full administrative control over user credentials to assist locked-out personnel and enforce security policies:

- **Method 1: 1-Click Quick Reset:**
 1. In the Team Management table, locate the target user and click  **Password** in the actions column.
 2. Click the  **Quick Set: admin123** button. The user's password is immediately restored to **admin123**.
 3. Alternatively, type any custom password (minimum 4 characters) in the input box and click Save.
- **Method 2: Profile Update Modal:**
 1. Click  **Edit** on any user row.
 2. Enter a new password into the "New Password (leave blank to keep current)" input field and click Save Member.

4.4 Invoicing & Client Billing System

An integrated billing engine that transforms project time into client revenue. Access via a project workspace by selecting the  **Billing** tab:

- **Automated Invoice Generation:** Click **+ Create Invoice**. The system automatically pulls all **Unbilled Timesheets** associated with the project. Check the time entries you wish to bill; the system compiles line items and calculates totals using a standard hourly rate (\$50/hr).
- **Discounts & VAT Customization:** Specify discount amounts (\$) and tax/VAT percentage rates (e.g., 7%) before saving.
- **Lifecycle Management:** Click the status button on any invoice card to cycle through payment states:  **Unpaid** →  **Paid** →  **Overdue** →  **Cancelled**. Marking an invoice as "Paid" permanently locks all linked timesheet entries as billed.
- **PDF Print & Delivery:** Click an invoice card to open the **Professional Invoice Preview Modal**. This renders an official, branded financial document complete with status watermark badges. Click  **Print / Save PDF** to generate a client-ready document.

4.5 Data Export (Excel & CSV)

To support external accounting software and offline data auditing:

- **Exporting Invoices:** In the Billing tab, click  **Export** to download an **invoices_export.csv** file.
- **Exporting Tasks:** In the Tasks tab, click  **Export** to download **tasks_export.csv**.

- **Seamless Excel Compatibility:** Every exported CSV file is embedded with a **UTF-8 Byte Order Mark (BOM)** and double-quoted string formatting. When opened in Microsoft Excel or Google Sheets, international characters (including Thai text), client names, and financial figures render flawlessly with correct column alignment.
